BACKUP OPTIONS

Back up my files and database   [YES] [**NO**]

Automatically back up your database and files in order to restore your shop if needed. This is experimental: you should still perform your own manual backup for safety.

Back up my images   [YES] [**NO**]

To save time, you can decide not to back your images up. In any case, always make sure you did back them up manually.

UPGRADE OPTIONS

Server performance   [Low (recommended) ▼]

Unless you are using a dedicated server, select "Low".
A high value can cause the upgrade to fail if your server is not powerful enough to process the upgrade tasks in a short amount of time.

Disable non-native modules   [YES] [**NO**]

As non-native modules can experience some compatibility issues, we recommend to disable them by default.
Keeping them enabled might prevent you from loading the "Modules" page properly after the upgrade.

Upgrade the default theme   [**YES**] [NO]

If you customized the default PrestaShop theme in its folder (folder name "classic" in 1.7), enabling this option will lose your modifications.
If you are using your own theme, enabling this option will simply update the default theme files, and your own theme will be safe.

Switch to the default theme   [YES] [**NO**]

This will change your theme: your shop will then use the default theme of the version of PrestaShop you are upgrading to.

Keep the customized email templates   [**YES**] [NO]

This will not upgrade the default PrestaShop e-mails.
If you customized the default PrestaShop e-mail templates, enabling this option will keep your modifications.
